SmartVent Positive3 is a centralised positive pressure system that monitors temperature and humidity conditions in your home, roof cavity, and at the outside source, to ensure that your home is kept dry, and your air is fresh. Two wireless temperature and humidity sensors means sensors can be placed in the optimum locations and not limited by cabling.

As a temperature and humidity based solution, the SmartVent

Positive3 uses dew point control to increase or decrease airflow to control the moisture within a home.

Key features; energy efficient brushless EC fans, acoustic and thermally insulated ducting, low temperature protection, user-friendly control system and App control (SmartLife). The flexible upgrade options allow users to customise the system to suit their individual needs.

CAT 6
PATCH LEADS

More
Information

The PLC6 Series patch leads are essential for network and communication
applications that require affordable, swift delivery. These cables provide
a fast and reliable connection between equipment such as routers,
modems, switches and other wired devices. Cat 6 UTP, packaging has no
single use plastics.
