

Goldair™

Wall Mounted Metal Panel Heaters

Panel Heaters are convection heaters and provide warmth based on the principle of hot air attracting cool air over a large panel surface. Air is drawn over the element and rises up through the unit and out the top through vents.

Great for

- Lounges, hallways, & bedrooms
- Heat pump complementary heating
- Quiet operation
- Simple manual operation

Wall mountable option
Saves up valuable floor space

Adjustable thermostat
Regulate your level of warmth

Castor wheels
Easy to move around

Our range of Metal Panel Heaters come with easy to install mounting brackets and casters for a choice of a fixed or permanent heating solution.
