Residential Lighting

CREATING MOODS IN DIFFERENT SPACES THROUGH LIGHTING

Of all designs, domestic is the one that works best when the electrical contractor and home owner are all involved. A home's lighting must provide safety, function, mood, entertainment and fit in with the decor. Bringing that all together will result in a residence that makes a statement, while maintaining a homely feel.

PARTNERSHIP WITH DESIGN BUILD

Bringing expertise and experience to the table early on in a project's life, could be the edge to winning the contract or getting the construction across the line. From designing and building unique one-off light fittings, to using product in an imaginative and productive way, the result you present to your client will help set you apart. Having the choice across all brands and understanding these products in detail, ensures we offer the correct product for the best solution.

PROJECT DESIGN PARTNERSHIPS FROM CONCEPT TO COMPLETION

Industrial sites come with their own very unique challenges; large scale, adverse conditions and endless diversity. Knowing your supply partners, knowing the product and knowing the desired result is essential to a successful outcome. The requirements on product selection from weight, windage, output, performance, and life span, can all have a marked effect on the outcome.

IES LIGHTING DESIGN AWARD OF COMMENDATION

Every design has unique properties, but when it's one with such high expectation, importance and emotional attachment, trust becomes the main principle.

Trust the Lighting Solutions team, we have the expertise and the experience to deliver a memorable result.

A low-angle photograph of the Christ Church Transitional Cathedral at night. The building's most striking feature is its large, triangular stained-glass window, which is illuminated from within, casting a warm glow. The window is composed of numerous smaller triangular panes, each containing a different colored stained-glass design. The building's exterior is clad in dark, vertically ribbed panels that reflect the ambient light. The sky above is a deep, clear blue. In the foreground, a black wrought-iron fence with pointed finials runs across the frame. The entrance of the cathedral is visible at the base, showing a modern glass and metal facade. The overall atmosphere is one of architectural grandeur and spiritual warmth.

Bespoke

Public Spaces

ENTERTAINMENT & RECREATION

When the design and fittings have to both perform functional tasks, and yet fit in with the fun of the environment, placement and choice is paramount. Public spaces must meet the high mechanical stresses of the environment and withstand high population density while providing usable light that protects people and the environment.

Our unique position allows us to offer the most up to date fittings across a huge range of suppliers, resulting in the best offer for the desired outcome.

Entertainment

Offices

Workspaces & Education

NATURAL WHITE LIGHTS FOR FUNCTIONAL WORK SPACES

As workspace and education environments evolve, new demands must be met by great design and product choice. While regulation guidelines are set, many other considerations need to be made, such as; glare, colour temperature, flicker free, system control and mechanical properties.

Portfolio

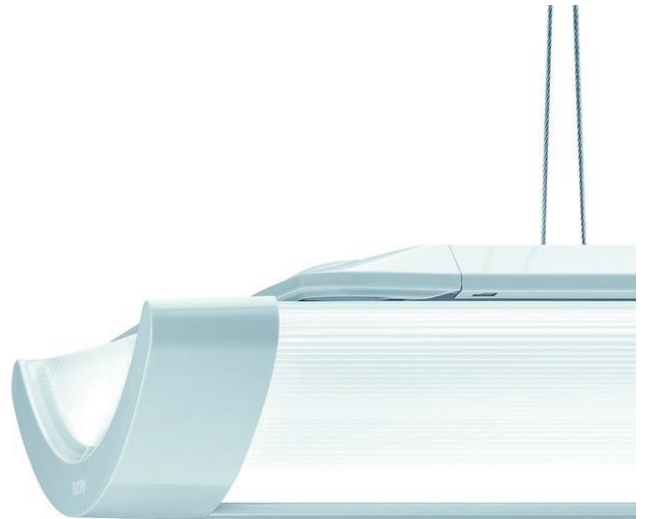

CUTTING EDGE & STATE OF ART

In a world where LED lighting has exploded into the market, staying informed is essential. We are in regular contact with key suppliers, not only being first to see new product, but also being involved in early prototype discussions. This in-depth involvement at product level, ensures we are offering the best solution. We also have a very enviable reputation of first installations of new product, ensuring our customers are at the cutting edge.

Safety & Compliance

PS1 AUTHORISED FOR YOUR NEXT PROJECT

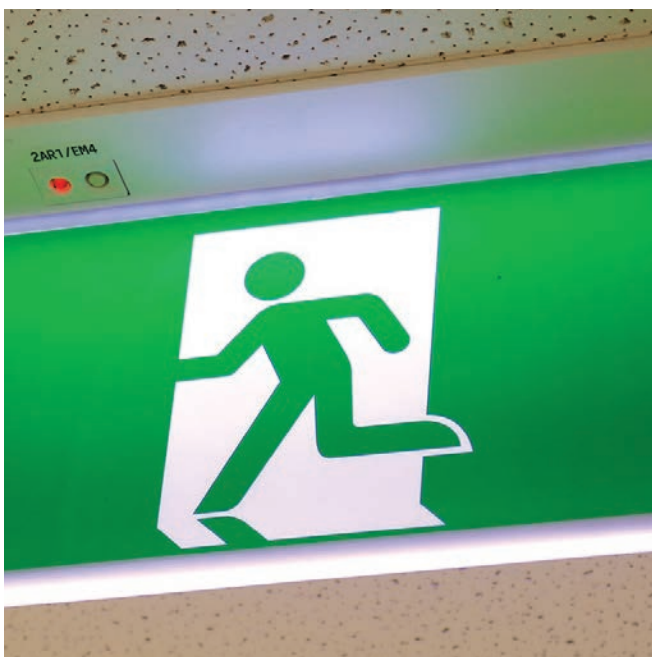

Emergency

ENSURING EVERYTHING IS TO STANDARD

Getting out of a building safely is the golden rule. We are Auckland Council certified to design an emergency PS1 to follow on from the fire report. We provide documentation required for the consent process. Being across the latest innovations in the emergency sector lets us offer state-of-the-art battery technologies and building monitoring control systems.
