BUILT FOR IT.™

A TURNING POINT IN SMARTPHONE INNOVATION

Be among the first to have the world's original thermal imaging integrated and most waterproof smartphone. Combining multiple tools in just one device, the Cat® S60 takes on-the-job reporting to a new level with the ability to quantify your work as never before. Revolutionise the way you see the world with the power of thermal in your hands.

SEE THE WORLD DIFFERENTLY

The first of its kind, the Cat S60 gives you access to live thermal imaging expertise direct from your smartphone. Utilising MSX Technology (exclusive to FLIR®) this rugged smartphone will give you shareable clear thermal imagery, video and even timelapse footage. Multiple spot meters allow you to retroactively pinpoint a temperature in your image while the thermal imagery technology is capable of penetrating even obscurants like smoke.

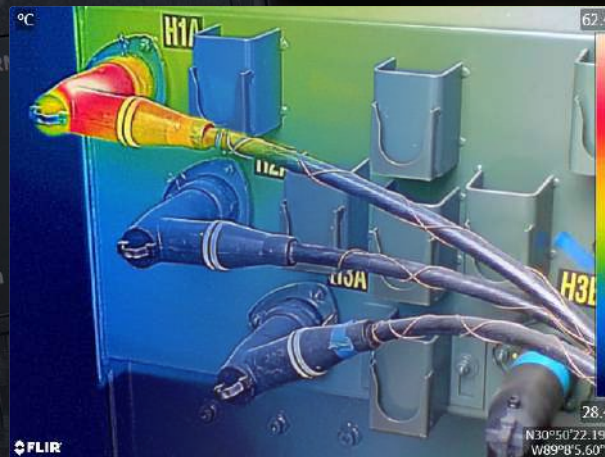

LIKE A FISH TO WATER

The world's most waterproof smartphone can survive depths of up to 5 meters for 60 minutes using our unique Lockdown Switch**. The S60 can also take underwater photographs and video, as well as boasting a glove and wet-finger compatible Corning® Gorilla® Glass 4 touchscreen.

KEEP COOL IN TOUGH SITUATIONS

Drop-proof to 1.8m and reinforced with a strengthened die cast frame, the Cat S60 exceeds even military specifications, making it the perfect companion to those living even the most rugged of lifestyles.

ENDLESS POTENTIAL

With thermal imaging available at the simple touch of a button, you can quickly identify gaps in insulation, electrical faults and monitor the performance of machinery. You can even check the gas cylinder levels for your barbeque or find the freshest loaf of bread at the market. But really the possibilities are endless...we're looking to YOU to find them all.
