Product Statement

The MR014GZ - 40Vmax XGT/18V LXT Jobsite Bluetooth Speaker is a powerful and versatile audio solution designed to elevate your worksite experience. Compatible across both 40Vmax XGT and 18V LXT platforms as well as AC power with the included adapter, this speaker delivers exceptional sound quality and volume.

The MR014GZ boasts a range of advanced features, including high-quality Bluetooth codecs for seamless audio playback, a built-in microphone amplifier, and a Type-A USB output port for charging your devices.

Its enlarged component speakers, passive radiators, and improved sound pressure level ensure a powerful, deep bass and crystal-clear audio performance. Designed for the rigors of the job site, the MR014GZ is IP65-rated for dust and shower-proof protection, and its enlarged color LCD screen and illuminated control buttons make it easy to navigate and control your music.

The Bluetooth transmission power has been upgraded to Class 1, reducing the risk of interrupted communication even at greater distances of up to 30 meters, with a maximum range of 100m.

The speaker also features a convenient smartphone stand, allowing you to securely position your device for hands-free use.

Additionally, the MR014GZ can be connected to up to 10 units in the mono configuration, enabling you to create a powerful, synchronized audio system across your worksite.

Product Overview

HEAVY DUTY BRUSHLESS

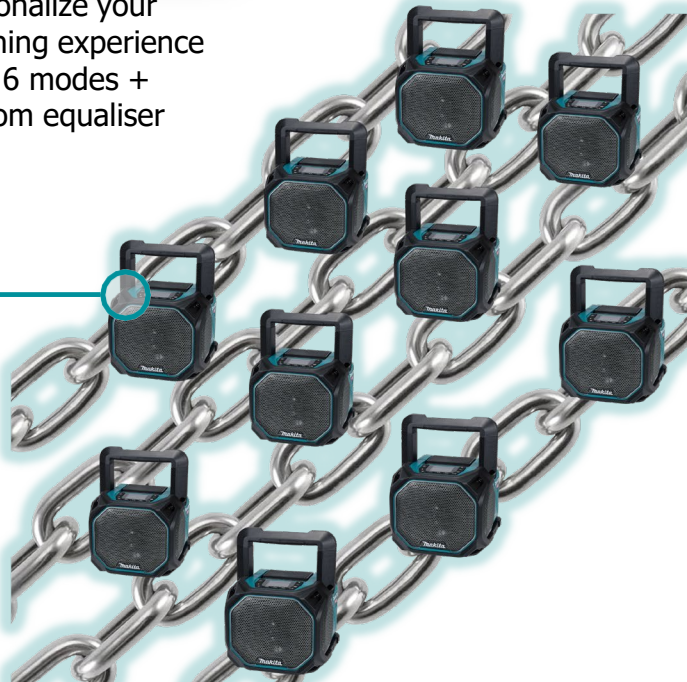

Improved Bluetooth range, reaching up to 100m

Colour LCD display

Personalize your listening experience with 6 modes + custom equaliser

Group Chain – allows up to 10 speakers to connect to provide powerful sound even in large spaces

Built-in smartphone holder when handle is raised

XGT, LXT, and AC Compatible

2x 100mm Passive Radiators L/R

USB-A port
AC port
AUX
MIC

Highly durable housing design with IP65 rating against dust and water

LED light bar with the option to sync to music

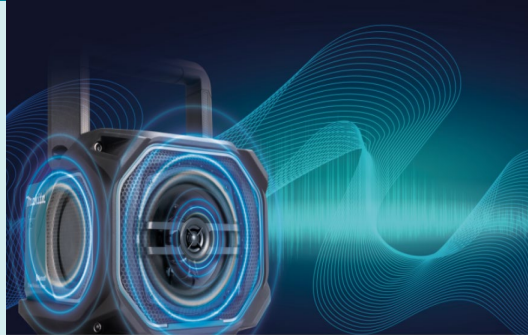

Product Specifications

- **High Quality Sound** – Powerful deep bass and high sound quality have been achieved due to improvements such as enlarged component speakers.
- **Enlarged Colour LCD Screen** – The LCD displays information related to the audio, such as the equalizer settings, song title, artist name, and album title, etc.
- **Group Connect** – Group chain allows you to link up to 10 speakers for ultimate wireless sound
- **Robust Construction** – Highly durable housing design with an IP65 rating against dust and water
- **Lightweight** – Compact design makes this easy to transport and store without taking up space

SPECIFICATIONS	
Battery compatibility	40Vmax / 18V
Max volume	Bluetooth: 99 dB(A) / AUX IN: 99 dB(A)
Inputs/Outputs	AUX IN: 3.5 mm (1/8") Mic input port: 6.3 mm (1/4") USB Type A for 5V / 2.4A AC Adapter port
Weight	3.8kg
Dimensions (handle down)	243 x 236 x 205 mm

Powerful Sound

140mm subwoofer, 40mm tweeter, and 2x 100mm passive radiators for a powerful, rich sound

Technology

TWS Chain Link enables up to 10 speakers to connect to a mobile device, playing simultaneously

Convenience

Integrated Smart Phone Holder for all-day listening

Innovation

Built-in LED light that syncs with the beat of your music

Advantages

HEAVY DUTY BRUSHLESS

Dust and shower proof construction

The IP rating or ingress protection rating is an international standard that classifies the degrees of protection a product can withstand from solid objects like dust and water. The first digit indicates protection against solids and the second digit against liquids.

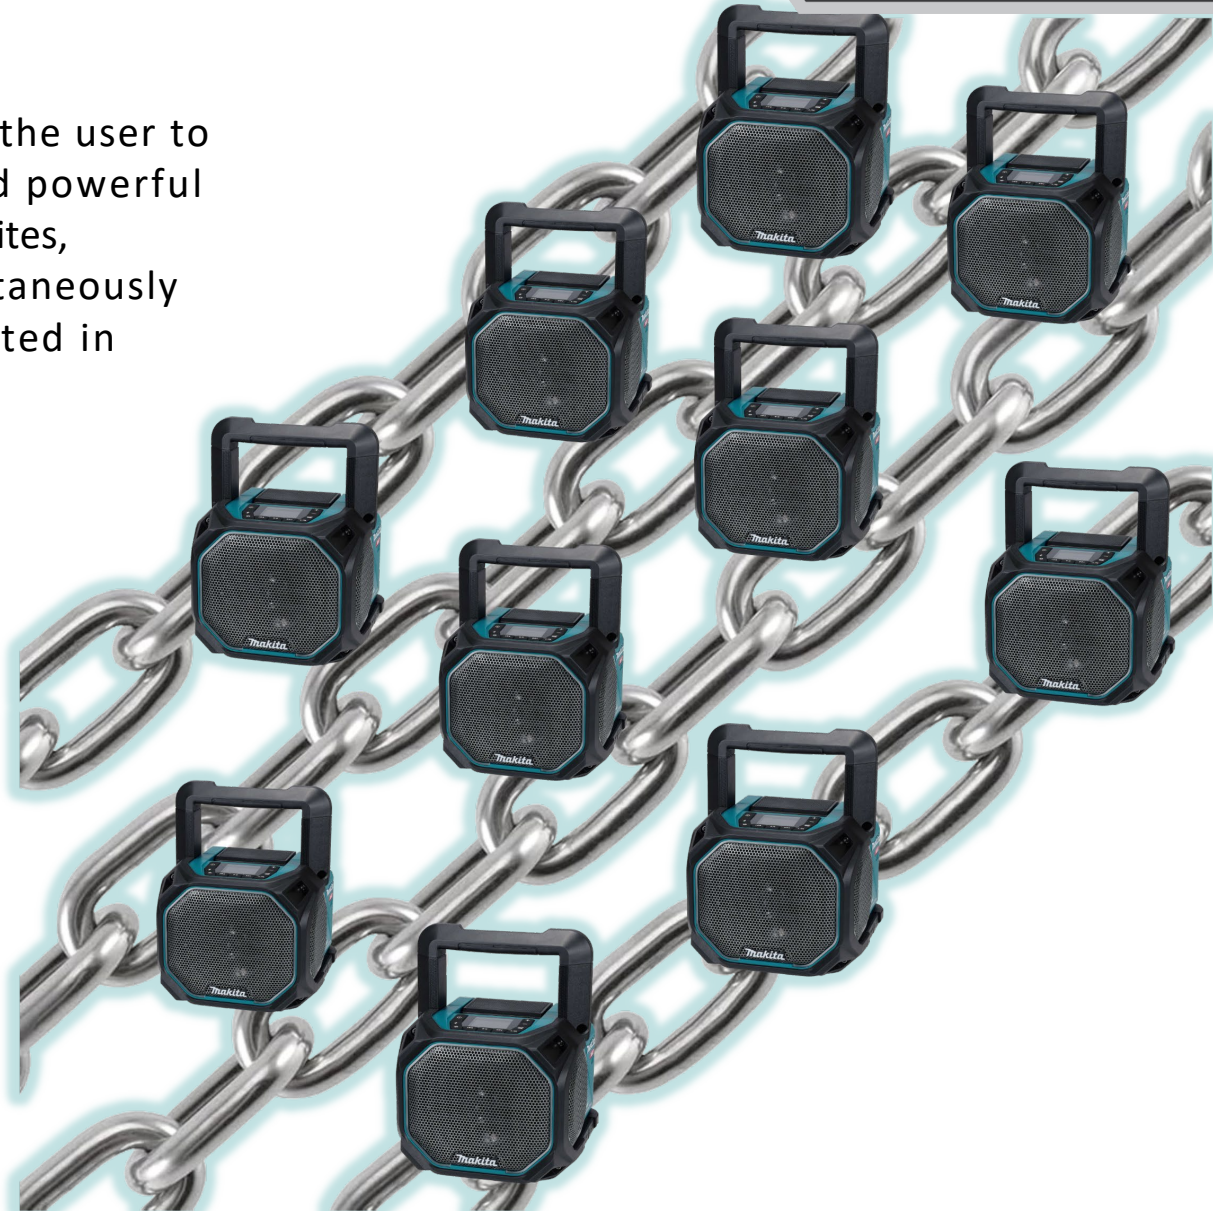

The MR014G is credited with an IP65 rating, meaning protection from total dust ingress as well as protection against water jets from any angle.

IP65

Group Chain – Multi-speaker connectivity

The MR014G features the Group Chain feature, allowing the user to wirelessly pair up to 10 speakers to provide deep, rich and powerful sound. This feature makes it ideal for larger venues and sites, allowing multiple speakers to play the same sound simultaneously from a Bluetooth connected mobile device. When connected in group chain all speakers play in mono (single channel)
